GEOLABS®

Company (name and contact details):

Project name:

Project No.
GEO/
for Geolabs use only

Possible Hazard identification
- ☐ Non-hazardous
- ☐ Hazardous
- ☐ Unknown

SCHEDULE OF SOIL TESTS

Page of

Sample				Und'd Triaxials			Other tests									Chemical Tests					Special Tests					Additional Tests				
BH / TP No.	Depth (m)	Sample Ref.	Type	Set of 3 x 38mm specimens	Multi Stage (38, 70 or 100mm)	Single Stage (38, 70 or 100mm)	Consolidation / Swelling	Particle Density	Atterberg Limits (1 or 4 Point Cone)	Sieve Analysis (note at what %age sedimentation is req'd)	Pipette Sedimentation	Compaction Tests (2.5kg, 4.5kg , Vibro)	Moisture Condition Value (One Point or Calibration)	California Bearing Ratio	Natural Moisture Content	pH	Sulphate Determination Total / 2:1 W/S or Groundwater)	Organic content or Loss on Ignition	BRE SD1 Suite (All sites / Brownfield / Pyritic)	Contamination Testing (Please specify type)	Consolidated Undrained Triaxial (diam and type {Single / M/S / Set})	Consolidated Drained Triaxial (diam and type {Single / M/S / Set})	Triaxial Permeability	Direct Shear Tests (Size and type {'quick' / drained / residual})	Ring Shear Tests	Intact Dry Density / SMC	Point Load Tests / Rock UCS			Test Instructions
			Totals
